

Karen's Claude Code Cheatsheet

Personal reference · custom skills & plugins · cc.storyfox.cz for built-ins

■■ Caveman Mode	
<code>`/caveman`</code>	Activate caveman mode (default: full)
<code>`/caveman lite`</code>	No filler/hedging. Keeps articles and full sentences
<code>`/caveman full`</code>	Drop articles, fragments OK, short synonyms. Classic caveman
<code>`/caveman ultra`</code>	Abbreviate everything (DB/auth/req/res), arrows for causality (X→Y)
<code>`/caveman wenyao-lite`</code>	Semi-classical Chinese. Drop filler, keep grammar
<code>`/caveman wenyao-full`</code>	Full ■■■■. 80-90% character reduction
<code>`/caveman wenyao-ultra`</code>	Extreme classical Chinese compression
<code>`/caveman-help`</code>	Show caveman command reference card
<code>`/caveman-commit`</code>	Write commit messages in ultra-compressed Conventional Commits format
<code>`/caveman-review`</code>	Compressed one-line-per-comment code review
<code>`/caveman-compress`</code>	Compress CLAUDE.md / memory files to caveman format (saves original as <code>`.original.md`</code>)
<code>`stop caveman`</code> / <code>`normal mode`</code>	Deactivate caveman mode

■■ Dev Workflow	
<code>`/grill-me`</code>	Stress-test a plan — asks 5–10 targeted questions to expose weak spots
<code>`/grill-me @FILE.md`</code>	Grill an existing spec or design doc
<code>`/git-branch-creator`</code>	Create branch with naming convention <code>`creator/category/task-name`</code>
<code>`/codex-review`</code>	Analyze git changes and recommend the right Codex review command
<code>`/coding-dispatch`</code>	Break multi-step tasks into subagents and execute sequentially
<code>`/skill-creator`</code>	Guide for creating or updating skills
<code>`/sos`</code>	Stuck on setup — design a Claude Code workflow (hook/skill/MCP/CLAUDE.md)

■ Code Review — Plugin: `sd0x-dev-flow`	
<code>`/sd0x-dev-flow:codex-review-fast`</code>	Quick second-opinion via Codex MCP (diff only, no tests)
<code>`/sd0x-dev-flow:codex-review`</code>	Full review: lint:fix + build + Codex verdict
<code>`/sd0x-dev-flow:codex-review-doc`</code>	Document/spec review via Codex MCP
<code>`/sd0x-dev-flow:codex-review-branch`</code>	Full review of an entire feature branch
<code>`/sd0x-dev-flow:codex-security`</code>	OWASP Top 10 security review via Codex
<code>`/sd0x-dev-flow:codex-test-review`</code>	Review test coverage, suggest edge cases
<code>`/sd0x-dev-flow:simplify`</code>	Wrap-up refactor: remove duplication, preserve behavior
<code>`/sd0x-dev-flow:best-practices`</code>	Industry best-practices conformance audit
<code>`/sd0x-dev-flow:pre-pr-audit`</code>	5-dimension confidence audit before creating a PR
<code>`/sd0x-dev-flow:risk-assess`</code>	Breaking-change detection + blast radius before committing
<code>`/sd0x-dev-flow:seek-verdict`</code>	Independent second-opinion for any finding

■ Development — Plugin: `sd0x-dev-flow`	
<code>`/sd0x-dev-flow:feature-dev`</code>	Feature implementation workflow (plan → code → test → review)
<code>`/sd0x-dev-flow:bug-fix`</code>	Bug fix workflow with hypothesis loop
<code>`/sd0x-dev-flow:debug`</code>	Hypothesis-driven debugging probe loop
<code>`/sd0x-dev-flow:refactor`</code>	Multi-target refactoring orchestrator
<code>`/sd0x-dev-flow:precommit`</code>	Pre-commit checks: lint:fix → build → test
<code>`/sd0x-dev-flow:precommit-fast`</code>	Quick pre-commit: lint:fix → test
<code>`/sd0x-dev-flow:smart-commit`</code>	Analyze changes, group by cohesion, generate commit messages
<code>`/sd0x-dev-flow:codex-implement`</code>	Implement features via Codex MCP
<code>`/sd0x-dev-flow:codex-brainstorm`</code>	Adversarial brainstorm: Claude + Codex debate

■ Analysis & Planning — Plugin: `sd0x-dev-flow`	
<code>`/sd0x-dev-flow:codex-architecture`</code>	Architecture consulting via Codex
<code>`/sd0x-dev-flow:deep-research`</code>	Multi-source research orchestration
<code>`/sd0x-dev-flow:deep-analyze`</code>	Deep-dive analysis of a proposal
<code>`/sd0x-dev-flow:feasibility-study`</code>	First-principles feasibility analysis
<code>`/sd0x-dev-flow:req-analyze`</code>	Requirements decomposition and stakeholder scan
<code>`/sd0x-dev-flow:tech-spec`</code>	Tech spec generation and review
<code>`/sd0x-dev-flow:necessity-audit`</code>	Audit for over-designed spec elements

■ Documentation — Plugin: `sd0x-dev-flow`	
<code>`/sd0x-dev-flow:tech-brief`</code>	Convert implementation details into dev-sharing format
<code>`/sd0x-dev-flow:project-brief`</code>	PM/CTO-readable executive summary from tech spec
<code>`/sd0x-dev-flow:update-docs`</code>	Update docs to match current code state
<code>`/sd0x-dev-flow:doc-refactor`</code>	Simplify docs, visualize flows with diagrams
<code>`/sd0x-dev-flow:de-ai-flavor`</code>	Remove AI artifacts / AI-sounding language from docs
<code>`/sd0x-dev-flow:recap-doc`</code>	Post-development recap document generator

■ PR & Git — Plugin: `sd0x-dev-flow`	
<code>`/sd0x-dev-flow:create-pr`</code>	Create or update GitHub PR with `gh` CLI
<code>`/sd0x-dev-flow:pr-review`</code>	PR self-review: produce checklist, update rules
<code>`/sd0x-dev-flow:pr-comment`</code>	Post review comments to a GitHub PR
<code>`/sd0x-dev-flow:load-pr-review`</code>	Load PR review comments into session for analysis
<code>`/sd0x-dev-flow:merge-prep`</code>	Pre-merge analysis: compare source vs target branch
<code>`/sd0x-dev-flow:push-ci`</code>	Push to remote and monitor CI until done
<code>`/sd0x-dev-flow:watch-ci`</code>	Monitor GitHub Actions CI runs
<code>`/sd0x-dev-flow:smart-rebase`</code>	Partial rebase for squash-merge repos

Karen's Claude Code Cheatsheet

Personal reference · custom skills & plugins · cc.storyfox.cz for built-ins

■ Codex Plugin ('openai/codex-plugin-cc')

<code>`/codex:review`</code>	Code review against local git state
<code>`/codex:adversarial-review`</code>	Challenges implementation approach and design choices
<code>`/codex:setup`</code>	Check Codex CLI readiness, toggle stop-time review gate
<code>`/codex:rescue`</code>	Delegate investigation or fix to Codex rescue subagent
<code>`/codex:status`</code>	Show active and recent Codex jobs + review-gate status
<code>`/codex:result`</code>	Show final output for a finished Codex job
<code>`/codex:cancel`</code>	Cancel an active background Codex job

■ Microsoft 365 & Work

<code>`/morning-briefing`</code>	Daily briefing: Calendar + Email + Teams → dashboard (auto-runs on 🕒)
<code>`/teams-channel-digest`</code>	Read / send Teams messages; analyze channel discussions
<code>`/outlook-email-digest`</code>	Extract requirements from Outlook emails → Confluence
<code>`/uxd-weekly-digest`</code>	Cross-project UXD weekly digest from Teams + other sources
<code>`/designer-submodule`</code>	Git workflow for designers in submodules (zero git knowledge required)

📌 ■ Content & Communication

<code>`/social-media-refiner`</code>	Polish Threads/IG posts in @flying_k.s voice
<code>`/meeting-summarizer`</code>	Summarize meeting recordings or notes
<code>`/meeting-quality-gate`</code>	Evaluate if a meeting is worth holding

■ Personal

<code>`/fortune-stick-interpreter`</code> <code><🔮></code>	Interpret Taiwan traditional fortune sticks (🔮/🔮/🔮 etc.)
<code>`/pole-move-organizer`</code>	Sort and format pole dance move code lists
<code>`/cost-monitor`</code>	holylot.app weekly cost report (Fly.io + OpenRouter + Cloudflare)

■ Design & Prototyping

<code>`/huashu-design`</code>	🔴Design: HTML high-fidelity prototypes, animations, slides, app mockups
-------------------------------	---

■ Knowledge Management

<code>`/knowledge-base ingest`</code>	Add raw material to AI/LLM knowledge base (web / PDF / image / text)
<code>`/knowledge-base ingest`</code>	Extract YouTube transcript → summarize → save to `raw/youtube/` (no API key needed; requires `pip3 install youtube-transcript-api`)
<code>`/knowledge-base compile`</code>	Compile raw docs into wiki articles
<code>`/knowledge-base query`</code>	Ask questions to knowledge base
<code>`/knowledge-base lint`</code>	Health check knowledge base

■ Claude Code Meta

<code>`/basic-concept`</code>	Interactive guide to Skill fundamentals
<code>`/sync-health-check`</code>	Check Jottacloud sync + git status for all vibe projects
<code>`/claude-workflow-designer`</code>	Design Claude Code workflows (hook / skill / MCP / CLAUDE.md)
<code>`/sd0x-dev-flow:claude-health`</code>	Claude Code config health check + plugin sync audit
<code>`/sd0x-dev-flow:project-setup`</code>	Project config initialization (auto-detect ecosystem)
<code>`/sd0x-dev-flow:install-hooks`</code>	Install plugin hooks into project `.claude/` persistently
<code>`/sd0x-dev-flow:statusline-config`</code>	Customize Claude Code statusline
